Why this supercar capsule is far from your average garage

Superfuturesdesign* has created a new design service to showcase luxury automobiles in the most architectural way

Why this supercar capsule is far from your average garage

Supercar enthusiast will now have the opportunity to showcase their statement pieces in the most architecturally inspiring way. More private showroom than it is garage, design studio [Superfuturesdesign*](#) has unveiled the Supercar Capsule – a concept that will allow owners of luxury automobiles the chance to make their [supercars](#) part of their home décor.

Developed by a team of architects and designers to create a distinctive spatial experience for the 'supercar', this specifically designed capsule consists of unique ports that keeps the automobile in a closed space, allowing owners' supercars to emerge as if from a private showroom.

The brainchild of Italian consultancy firm ASZarchitetti Group – which includes architecture studio ASZarchitetti and Superfuturedesign* – Supercar Capsule can be personalised for any home. Car enthusiast can opt to completely remodel the interior of their garage to give a refreshing new finish with lighting effects and colour scheme, all the while highlighting the supercar's special features, or they can decide to create a new capsule to merge with the home's interior. With this model, a range of customisation options are available, including the addition of windows so your car can be viewed directly from the living room – much like in a gallery.

Either way, your high-end luxury automobile will still turn heads, even when it's not on the road.
