Who needs a boring garage? SUPERCAR CAPSULE is here

SEPTEMBER 15, 2019

SUPERFUTUREDESIGN* creates the SUPERCAR CAPSULE, a unique concept that gives your expensive toys a centrestage to captivate the audience.

Developed by a team of architects and designer for a taste of bespoke luxury, which includes supercars. Their passion for spectacular supercars has led them to create a distinct spatial design that enhances the car's features. After all, your luxury car should get just as much attention as your home.

The SUPERCAR CAPSULE a new concept by SUPERFUTUREDESIGN*, so you can add that to the portfolio in addition to their award-winning architecture and design work. The SUPERCAR CAPSULE is a palette of unique ports that keep the automobile in a closed space, allowing owners' supercars to emerge as if from a dedicated showroom. It's an exclusive design service to transform your garage into your private showroom, so now you can feel like a millionaire from a superhero movie. This unique space will encourage visitors, guests, and the owner to appreciate its qualities. As a result, your supercar contributes to a distinct aesthetic experience at home, even when it's not on the roads.

SUPERCAR CAPSULE is the brainchild of Italian consultancy firm ASZarchitetti Group, comprising ASZarchitetti and SUPERFUTUREDESIGN*. Combined, the design collective has completed well over 400 projects across the residential, commercial, and luxury retail sectors throughout Europe, Asia, Saudi Arabia, and of course, the Middle East. During its 20 years of operation, the ASZ Group has excelled at proposing novel design solutions for demanding clients. Spectators and audiences can understand more about their impressive 'winning streak' of successful projects through press publications and awards.

Each SUPERCAR CAPSULE can go beyond the limit in terms of individuality and customisation. This is because they're custom-made in every new setting, so you see the construction develop from the ground up. You can choose from a plethora of custom options to make sure your SUPERCAR CAPSULE aligns with your needs, style, property, villa type, and car park size. Nonetheless, to maintain steady efficacy in each project, the design is based on a range of predefined configurations. These are used as a pinboard for every customised project.

You can select a captivating SUPERCAR CAPSULE based on your space requirements and how you would like to display your car. One of the models involves creating a new capsule to merge with the home's interior. This will incorporate the garage with existing rooms, in which a simple wall will transform into a bespoke exhibition for your statement piece. It allows guests and visitors to appreciate and admire your supercar without having to take them to the garage – your car becomes a part of the interior décor.

If your home has a garage, you can opt for completely remodelling the interior to give it a refreshing appeal via new finishes, lighting effects, and colour schemes to highlight your supercar's aesthetic. If you have a taste for displaying your supercar as a separate entity from your home, you can opt for constructing a new parking area that's independent of your home. It will be installed in the garden or any other free space as per your villa's spatial elements, to showcase your supercar within its own dedicated showroom. This displays your prized possession and asset in a sculptural way by accentuating all its best features.

The UAE-based company SUPERCAR CAPSULE channels the expertise of professional European engineers, designers, and architects to create captivating garage spaces for cars that serve an aesthetic purpose and radiate exclusivity. We have 20 years of expertise in the construction and architecture fields, delivering new solutions to every client whilst pushing the limits of creativity and reaching new heights of innovation.

The SUPERCAR CAPSULE project is aimed towards car lovers and enthusiasts who go the extra mile for understanding and appreciating an automobile's qualities. Unlike other types of residential architecture and design, the SUPERCAR CAPSULE is dedicated to showcasing your luxury car in a space designed just for it. It's a distinct abstract designed by supercar enthusiasts, so the entire project will be centred around the car's requirements and needs. In simple words, the designers understand what you want for your car, as well as the perfect conditions to maintain your car's prime.
